

SIRENS

"CALLING" | RELEASE INFO

Initiated by guitarist and songwriter Torsten (ex-BLEED INTO ONE, NO LESSON LEARNED), the band started as nothing more than an idea based on the wish to play his favourite music-style. He wrote a couple of songs, recorded demos and played them to his friends Daniel, Micha (7THSEALBROKEN, ex-NYARI) and Michael (TEAMKILLER). The idea soon became a project-band and the first collective band practice was scheduled. Everyone involved was amazed by the song-material and its outcome and the decision to make this project a serious band was made. SIRENS was born. One more band practice followed until the band entered Jörg's (Movies of the Future) YouAreGay-Studios to record their debut MCD "calling".

Although "calling" is SIRENS' first sign of life, the band's maturity and tightness can easily compete with the scene's old stagers. At the same time SIRENS represent a stirring youthful and energetic spirit. With influences reaching from late 80s and mid-90s "youth crew" Hardcore to modern bands like KILLING THE DREAM, WITH HONOR or REACH THE SKY, SIRENS manage to create their very own style. Straight forward hardcore music with an honest retro feel to it, a good portion of melody and challenging guitar work.

SIRENS is about to carve out a niche in the subgenre of traditional hardcore music. Their unique style combined with their experience as musicians and their long-lasting dedication to hardcore music and lifestyle, entitles them to be one of Europe's most outstanding bands these days.

In order to put SIRENS in the position they belong, the band decided to team up with two of the most promising and hard-working European labels: POISONFREE RECORDS and LET IT BURN RECORDS. SIRENS' debut EP "calling" will be released in December 2005.

Prick up your ears: SIRENS calling...
