

# TeamKiller

## "Bound to Samsara" CD / Digital Download (LiB047)

**TAMAS** - Most scriptures begin with an introduction of the protagonist - not necessary in this case. Teamkiller have risen in the year 2003 and since then continuously advanced to become the monument of European Hardcore they are today.

**RAJAS** - The metamorphosis this band has gone through in 2008 and 2009 is one-of-a-kind. With a new singer emerging from their own rows and a completely intuitional development in sound, Teamkiller have finally found peace of mind and embraced their cathartic purification. In this spirit they do exactly what many other bands collapse with. They convince not only with their music but also with their absorbing live appearance and deeply spiritual charisma.

**SATTVA** - Kindred spirits with early 90s New York Hardcore, there are only very few bands that work as a comparison; Cro-Mags, Leeway and Merauder could do, yet most of all because these bands have their very own individual style, too. Adamant and forthright, at the same time thoughtful and introvertedly spiritual. Teamkiller have completed the conversion from an ordinary band to an unassailable institution and came across staggered faces and enlightened spirits.

2010 is the year when everything comes full circle. The cycle of samsara is about to end. Teamkiller release their long awaited second full-length album "Bound to Samsara" on Let it Burn Records in November. Concurrently they decide to split up after a final tour and farewell show at the end of their seventh year of existence. Surprising at first sight, but Teamkiller have defined their final position in the process of perceiving the deeper meaning of birth, death and rebirth.

### NO LONGER BOUND TO SAMBARA.
